

### Four Circular Velcro Pieces

These stickers will help you attach markers to any pair of shoes. Stick these to your shoes in the areas suggested by the Arena Software's Skeleton Wizard. We recommend using shoes that do not have any other form of reflective material already on them.

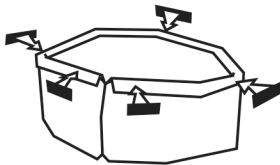

### Five Rectangular Velcro Pieces

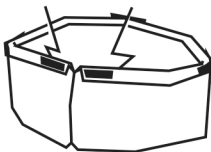

These strips will help you secure the suit's upper and lower halves into a single tight unit. Here is how to attach them:

1. Fold waist band down

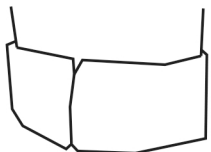

2. Apply the five rectangular Velcro strips as indicated at left

3. Tuck in shirt, pulling down as far as possible

4. Fold waist band back up, and secure to shirt

5. Suit setup complete
